Profile

Currently working as a Community Operations Analyst at Covalen, onsite of one of the biggest social media companies in the world, at the same time, I am studying Data Science in National College of Ireland. Two years ago, I completed my Business Administration master's degree in Dalarna University in Sweden. During the last three years my enthusiasm on digital and information technologies has encouraged me to learn different analytical and digital tools such as Microsoft Excel and VBA, programming languages of Python, R and SQL having completed several projects on data analysis for self-interest. Driven and detail-oriented with the ability to thrive in high pressure environments. I can work on my own (e.g. Safety Escalations) and also as part of a team.
